

Hand held Carbon Monoxide Detector

Model: AZ7701

Hand held personal Carbon Monoxide Detector

- Small personal detector,
- Loud alarm sounds when the gas level detected is greater than that set by the user,
- Alarm levels can be set between 0ppm up to 999ppm,
- The unit is approx the same size as a mobile phone,
- Ideal for service people visiting hotels, clubs etc where CO gas is likely to be found such as car parks, new freeways, wood fires, portable or stationery engines,
- Use to monitor CO levels while using generators or portable gas powered tools in enclosed spaces,
- The alarm comes pre-set at 25ppm and will alarm if this level is exceeded.
- Check carbon monoxide levels in the workplace etc to verify that ventilation systems are working
